Also, I talked to Alex Stone (Ecology), Mike Goldstein (EPA) and Bob McLeod (DOE) about the 300 Area agenda item for the meeting in Spokane. All three said it looked OK, so I told them that Teri would be contacting them to confirm between now and then. This topic is heating up, and DOE (HQ mostly but also RL) is using the Land Use Plan as a reason to push back on cleanups. They will argue to the NRTC that we can choose between more excavation (which harms the surface) or more groundwater contamination (with discharge to the River and other ecological issues). They will also claim that preferred uses of preservation-conservation-recreation in the 100 Area should make us happy. This was discussed at the HAB ER Committee meeting today; Jay was there for a while too.

Alex: 736-3018

Bob: 732-0096, Robert_G_Bob_Mcleod@rl.gov (old format with underscores)

Mike: 376-4010 Goldstein.mike@epa.gov

Do you think that you and I and Dan could start working on a letter to DOE about their level of participation? And, I think I will start on a letter with Jay about the 300 Area concerns. What do you think?

Barbara
